1. Executive summary & financial analysis

ABC Company is seeking an equity investment of ZAR XXX million to set-up a modern apartment complex located at XXX. The company has worked on major construction and property development worth a combined value of over ZAR XXX million around South Africa, mostly concentrated in XXX - across the education, health, retail and residential sectors ABC Company has already contributed over ZAR XXX as sunk costs towards acquiring XXX. The residential complex will have XX units.

While there are some scattered small XXX accommodations across XXX, there is no other modern, apartment-living style complex in XXX.

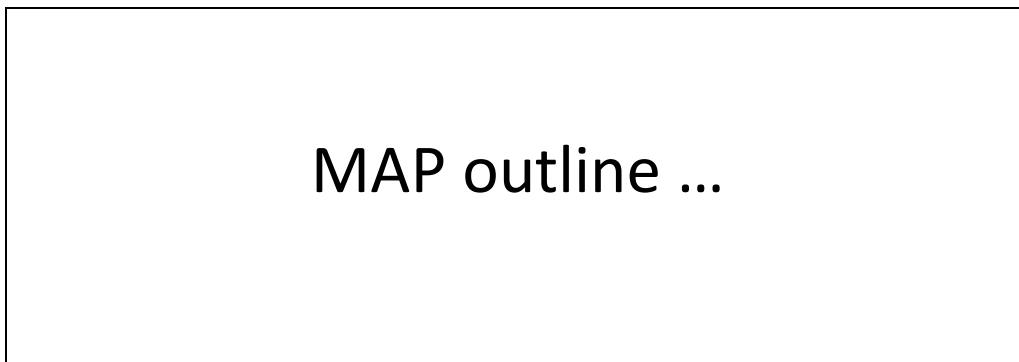

Figure 1.1: Map outline of

The ZAR XXX million investment is required in the form of XXX investment. As expected, owner's equity increases over the years as the business makes consistently increasing profits from year X to year X as displayed below.

Debt vs equity analysis X years

Figure 1.2: Debt to equity ratios across the first X years

As depicted in the chart below, starting with XXX debt, RONA increases at the same rate as ROE to reach XX % in year five. While XXX's ROE is lower than that of other businesses in the XXX and XXX industry in South Africa – which averages XX% in the year XXX - it is indicative of the conservativeness of our projections.

ROE vs RONA

Figure 1.3: ROE and RONA for ABC Company across the first X years

In order of size, our revenue streams will be in the form of XXX unit rentals at XX%, refundable deposits at XX %, XXX unit rentals at XX% and non-refundable admin fees at less than XX% of total revenues.

Figure 1.4: Contribution to turnover within the x year of operation

2. Required funding motivation

We are seeking a total loan investment of RXXX million to set-up our construction company in XXX Province.

Below is a detailed breakdown of how the funds will be allocated:

Allocation	Amount required	Percentage
Capital expenditure	RXXX	XXX%
Operational expenses for 1 year	RXXX	XXX %
	Total: RXXX	100%

The above investment will allow us to generate revenues of RXXX within the first year of operation ramping up to RXXX by Year X. The venture will be profitable from the first year with profits of RXXX ramping up to RXXX by Year X. The loan amount will further allow ...

3. The situation analysis

THE SITUATION

Over the years, the XXX industry has proven to be quite resilient and reliable as it continuously adapts to the ever-evolving industry trends. The XXX industry as a whole is very competitive, and it is imperative to be open to change and continuously improve XXX. Even though there is competition in the market, there is still a challenge in finding XXX, thus presenting the following gaps:

- Industry gap 1 ...
- Industry gap 2 ...
